Portfolio & Labs: github.com/SamuelJesusAssmann

Summary

Junior IT professional with hands-on experience in Technical Support, SaaS operations, Linux environments, and infrastructure labs using Docker and virtualization. Passionate about troubleshooting, cloud technologies, automation, and technical documentation.

Work Experience

IT Support Technician *March 2025 – Present* GRUPO MEGA SOLUÇÕES, BRAZIL

- Diagnose and resolve high volumes of inbound support tickets for SaaS platforms, maintaining high ownership and rapid resolution rates.
- Investigate technical issues within Windows and Linux environments, identifying software bugs and patterns for cross-functional escalation.
- Troubleshoot user access and software integration issues, utilizing Zendesk and internal Ticketing Systems to track and manage resolution workflows.
- Document standardized troubleshooting processes and technical solutions to build a comprehensive knowledge base for the support team.
- Collaborate with product teams to advocate for feature enhancements based on recurring user feedback and documented software platform limitations.

Education

Bachelor's Degree in Computer Science

UNIVERSIDADE REGIONAL DO NOROESTE DO ESTADO DO RIO GRANDE DO SUL (UNIJUÍ)
Expected 2028

Technical Degree in Information Technology

December 2025

Additional Skills

Infrastructure & Systems

- Linux
- Docker
- Networking
- TCP/IP
- Virtualization
- Samba

Support & Operations

- Technical Support
- SaaS Support
- Zendesk
- Troubleshooting
- Documentation

Development & Tools

- Git/GitHub
- API Basics
- Technical Writing

Languages

- Portuguese - Native
- English - Professional Working Proficiency

Projects

Linux Homelab & Infrastructure Labs

Built Linux-based infrastructure labs using virtual machines and Docker containers for hands-on practice with networking, troubleshooting, file sharing, and service deployment. Worked with Samba integration between Linux and Windows systems and explored reverse proxy and infrastructure organization concepts.

Technologies: Linux, Samba, Docker

SupportFlow Lab

Practiced SaaS support workflows, troubleshooting scenarios, documentation, and customer issue resolution simulations. Improved technical communication and understanding of ticket-based support operations.
